

IN THE SPECIFICATION

Please replace the paragraph beginning at page 18, line 12, with the following rewritten paragraph:

FIG. 3 is a view to explain light diffusion by the hologram surface in this embodiment. The hologram pattern in this embodiment is an optical pattern for anisotropic diffusion. The principal diffusion direction (see, e.g., directional arrow P in FIG. 3) of the hologram pattern is the direction from the side surface 204 to the opposite side surface. The direction is along the light incident surface 201, but not necessarily parallel with it. The light passing through the hologram pattern is greatly diffused in the Y-direction from the side surface 204 to the opposite side surface. The light is not substantially diffused or diffused only slightly in the X-direction from the light incident surface 201 to the opposite side surface.
